Summary

B.Tech Computer Science graduate with professional experience in full-stack web development, building and maintaining web applications using Next.js, React.js, Node.js, Express.js, and TypeScript. Experienced in developing RESTful APIs, integrating PostgreSQL and MongoDB databases, implementing authentication and authorization, and building responsive, SEO-friendly interfaces. Comfortable working in collaborative development environments with Git, code reviews, debugging, and agile workflows, with a focus on writing maintainable and reliable software.

Internship/WorkExperience

Software Developer Intern – KDISC

12/2025 – Present

- Developed and maintained full-stack web applications using Next.js, React.js, Node.js, and TypeScript.
- Built responsive and reusable UI components using React and Next.js.
- Designed and integrated RESTful APIs using Node.js and Express.js to support application features and frontend-backend communication.
- Worked with PostgreSQL to design database schemas, write SQL queries, and optimize data access.
- Implemented authentication and authorization workflows to support secure access to application features and resources.
- Investigated and resolved application issues through debugging, testing, and performance improvements.
- Collaborated with developers through Git-based workflows, code reviews, and agile development practices.

Freelance Web Developer – StratG

04/2026 – 06/2026

- Designed and developed a responsive corporate website for StratG, an environmental compliance and engineering services company.
- Implemented the website's key sections including company information, services, industries, compliance expertise, and contact functionality.
- Worked directly with the client to translate business requirements into a professional web presence and deliver the website.

ICTAK SUMMER INTERNSHIP

05/2023

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

- Gained practical, hands-on experience by building a Blood Bank Management

System using the MERN stack.

- Developed features for donor registration, blood inventory tracking, and request processing with a focus on real-time data updates.

Education

Btech Degree in computer science and Engineering,
Marian Engineering College
CGPA 6.5/10

08/2021 – 05/2025
Kazhakuttam,
Trivandrum

12th Computer Science, St joseph Hss Palayam
Percentage 92/100

03/2021 – 05/2021
Trivandrum

10th, Model BHSS Thycaud
percentage 90/100

03/2018 – 05/2019
Trivandrum

Technical Skills

ProgrammingLanguage

- Python
- Javascript
- C

DataBases

- MongoDB
- SQL

Framework & Libraries

- React.js
- Tailwind CSS
- Node.js
- Express.js

Tool & Platform

- Git
- Appwrite
- Flask
- Cloudinary
- Aws

Soft Skills

- Problem Solving
- Critical Thinking
- Communication
- Teamwork
- Adaptability
- Fast Learner

Projects

AI-Based Adaptive Learning Platform for Children with Disabilities,

Tech Stack: HTML, CSS, Bootstrap, JavaScript, Flask, MongoDB, OpenCV.

- Created an **AI-driven learning platform** featuring real-time emotion detection, stress intervention, and interactive letter practice with a responsive frontend and API integration.

Doc-Intelligence - AI-Powered Office Documentation & Deadline Tracker,

Tech Stack: React js, Flask, Python

- Built a **React.js frontend interface** for uploading files and displaying extracted deadlines, integrated with **Flask APIs** for OCR-based scanning and retrieval of key information.

Employee ID Generator with QR-based Security Verification,

Tech Stack :React js ,Express js, MongoDB cloud, Cloudinary

- Developed a **full-stack employee management system** featuring QR-based verification, secure access control, and cloud image storage.

Medium Like BlogPost, *Tech Stack : React js, Appwrite, Express js, Editor js*

- Created a **Medium-inspired blogging platform** with real-time engagement, secure user authentication, and a seamless writing interface using **Editor.js**.

Key Achievement

YIP District and State Level Winner 2023
